EnergyWire -- Thu., June 7, 2012 -- Read the full edition

1. HYDRAULIC FRACTURING: Wyo. regulator apologizes for 'inconsiderate remarks'

Wyoming's top oil and gas official, Tom Doll, apologized yesterday, hours after the state's governor repudiated Doll's assertion that a group of Wyoming residents pressing water pollution complaints are motivated by "greed."

2. COAL: A cautionary tale for U.S. energy policy unfolds in the Land Down Under

Coal and iron ore have transformed Australia into a regional powerhouse, propelling a 51 percent economic expansion over the past two years alone and spearheading an expected further gusher of export wealth from liquefied natural gas. Yet the remarkable boom has come at a price: Australia's dollar has surged 69 percent in value in the past decade, cutting into tourism and eroding the competitiveness of its manufactured products. Its manufacturing base has shrunk by almost 100,000 jobs over the past four years, according to government figures. As the boom has built, Australians have gone deeply into debt -- last year, they owed an average of 156 percent of their disposable household income, more than triple their 49 percent debt load in 1991. It's a dilemma that could be replicated in the United States.

## THIS MORNING'S STORIES

3. OIL SHALE: Utah's challenging but rich reserves attract Estonia's energy experts
4. NORTH CAROLINA: Senate passes fracking bill as USGS counts limited resources
5. LNG: Exports should serve to entice trade policy -- study
6. HYDRAULIC FRACTURING: Shortages loom for fracking ingredient, sending profit margins down
7. ENERGY MARKETS: Exxon Mobil will move thousands more workers to new Houston campus
8. OIL SANDS: Energy policy focus is 'really historic mistake for Canada' -- consultant
9. SHALE GAS: Development overseas is 'inevitable' in next decade -- report
10. ENERGY MARKETS: Some Ohio leases to hit the block as Chesapeake whittles down debt

## E&ETV'S ONPOINT

11. WATER POLICY: Reclamation chief Connor discusses impact of regulations on hydropower expansion
